Model search

John Williams

July 21, 2015

1 Data

The R code below is just to show which data file is being used. All analyses were performed with R version 3.2.1.

```
dir_n <- "/home/john/Dropbox/Research/Collaboration/BEATS/John/W2S"
file_n <- "BEATS_SS_ForWalk2School_150507.sav"
(f <- fname(dir_n, file_n))

[1] "/home/john/Dropbox/Research/Collaboration/BEATS/John/W2S/BEATS_SS_ForWalk2School_150507.sav"
```

```
Error in file(filename, "r", encoding = encoding):  cannot open the
connection
```

2 Univariate models, with all moderators

```
Error in eval(expr, envir, enclos):  object 'dat.ats' not found
Error in datadist(dat_m1):  object 'dat_m1' not found
Error in terms.formula(formula, specials = "strat", data = data):  object
'dat_m1' not found
```
